

About Me

This is Shao, currently based in Sydney, Australia. I have been in the digital marketing and event management field in the video game industry for more than 10 years. In the last half year, I worked on a few web projects which helped me developed the essential skills needed for a web development. I also have a strong Computer Science and Math background in university and have done a few game programming projects during my free time.

I am passionate in programming languages, but also love to work with a talented team. I am an efficient and productive individual, a fast-learner, self-motivator and a team player. I always seek for improvements and learn from mistakes.

Key Technical Skills

- Web development: HTML, CSS, Javascript, API, Node.js
- Software development: Java, C#
- Certificate: Sun Certified Java Programmer

Key Soft Skills

- Ability to give clear direction and detail methods to lead partner or team to run a successful project
